

EPad M3 Demo Walk Through

Demo Steps	Talking Points
Start ePad – Start Page	Discuss basic UI
Open Earth to the Moon	
Follow a chapter link	
Make a Bookmark	Point out that just tapping in the top makes the bookmark
Start a global audio note	Point out animated page recording icon next to page number
Page forward (Continuing to Record)	Talk about how the recording continues across pages
Hold on page number (cont. record)	Talk about holding for more
Move a head a chapter (cont. record)	Note that we are still recording.
Stop recording	
Tap on Bookmark	Show how tapping the bookmark does the obvious thing
Tap on Page Audio Icon	Show how the audio plays back, and the icon animates
Let play until end	Talk about how page changes follow the audio
Expand Audio panel	Don't talk too much about advanced controls, we'll say more later.
Show moving index bar changes page	Show that the page changes when the bar is dropped in the middle of a long multipage clip.
Talk about the Insert and Delete buttons in audio panel	
Close Audio Panel	
Turn the page	
Create a note	Remind about embedded notes
Draw on it	
Create another note	
Record in to it	Explain that recording goes in to the embedded note because it is open. Show the icon is animating in the embedded note.
Expand Audio panel	Explain the advanced controls in the Audio panel now
Tap auto record	Talk about how if you want to make several notes as you are reviewing a document you can make this an easy task.
Add some more notes by tapping	Show how notes are added automatically
Tap Stop on last note, Turn off auto record	
Close Audio Panel	
Go to Start Page	
Tap on the Notes Directory Link	Talk about how all the notes are here, both audio and written
Show the different views	Explain the different views
Follow a link	Show the note in place
Tap the Start Button	
Tap on Slate	
Show the existing bookmarks a clippings	Explain how bookmarks and clippings are now persistent, and note that the book returned to where you had it last open automatically.
Tap on the most right book mark	
Clip the first paragraph	Explain how easy it is to make a set of clippings
Highlight the word judges	Explain that we might want to find all areas of this publication so that we can clip relevant sections
Open the search panel	Show how the word "judges" is automatically populated in to the search field
Set scope to Slate	Explain about the search scope settings,
Click Go Search – Show results	Show how the search term is highlighted in the results
Follow a link in search results	Show how the search results directory is pinned and the word is highlighted in the text

Open Search Panel	Talk about how we might search for a term not currently on the display
Set Results to My ePad	Re-explain about scope (if necessary)
Show/Hide keyboard	Show how a word could be typed in
Say "anything" in to search box	
Tap go search – Show results	Point out how the search results are just another directory, like the notes directory and can be viewed and sorted the same ways.
Tap the link to email message	
Hold on page number – choose mail directory	Explain how this is consistent with book page menus, but customized for mail
Tap another mail message	Show how the system pins the directory by default
Read a few more messages	(just to load up history)
Hold on the Back Button	Explain how lower part is linear back, and top part is recent tasks. Point out how email is rolled up in the top section.
